

## Formative Assessment meets formative instruction

Learnia helps teachers be more efficient and students be more successful.

### Texas

**Learnia™ is the first formative assessment system for grades K–12 that truly leads to formative instruction. Most assessment tools are complicated and hinder the teacher-student relationship. Learnia is simple to use for students, teachers and administrators, yet powerful in its results.**

Through the use of short formative assessments, educators are able to measure students' progress throughout the year and make informed instructional decisions to maximize student learning. Using Learnia's patented answer analysis, teachers see where a student's learning has broken down and, more importantly, why. Armed with this information, teachers can create an optimized instructional environment capable of accelerating student achievement.

#### LEARNIA ADVANCED, TEXAS EDITION

Learnia Advanced, Texas Edition is a formative assessment system for grades K–12 that includes a continuously updated item bank for grades 3–8 with multidimensional alignment to the Texas Essential Knowledge and Skills (TEKS) objectives and skills included in the statewide assessment.

Learnia Advanced, Texas Edition is a tool of unmatched utility in maximizing student learning and ensuring improved results on the Texas Assessment

of Knowledge and Skills (TAKS). Learnia Advanced for Texas is aligned to the most critical objectives of the TEKS ensuring improved results on the (TAKS). Learnia Advanced provides a valid and reliable foundation of formative and summative assessments, with the look and feel of the TAKS, while providing item banking functionality to allow assessments to be created to match a district's pacing guide. Moreover, the summative tests provided with Learnia Advanced, Texas Edition, provide snapshots of student achievement so administrators and teachers can target students who need intervention and additional resources prior to the administration of the TAKS.

#### WHAT'S NEW IN LEARNIA ADVANCED, TEXAS EDITION:

- Valid and reliable summative assessments are provided to benchmark students to the state assessment as a foundation for further assessments administered to be administered formatively.

- Formative assessments which provide support for K–12 using either exercise items available for all grade levels or enhanced assessment items with patented answer analysis capabilities for high-stakes grades of 3–8.
- A Texas-specific item bank containing 4,200 items with multidimensional alignment to state standards.
- A flexible item bank containing more than 30,000 items that continues to be expanded and refreshed.
- A wide selection of assessment items that utilize **Pearson Education's** patented answer analysis to pin-point breakdowns in student learning and inform instruction.
- Expanded subject coverage of the TEKS aligned instructional exercise items for reading and math, with science and social studies items included as a bonus.
- Integrated Professional Services and a wide array of on-going Professional Development services are available to help ensure customers success and maximization of Learnia results.

Learnia's state-of-the-art reporting features provide practical data with immediate utility for teachers and administrators. Data can be aggregated and disaggregated to easily identify performance by student, roster, grade, classroom and school – without needing a statistician to interpret the results. Tests can be administered and scored online, with reports delivered in two formats, fixed and interactive. The fixed reports provide immediate, summary results on how students performed on a particular test, while the interactive reports allow teachers to drill down and analyze results at the item level to identify exactly where learning is breaking down.
